

Kadaň city elevates police security with ViPRO BV-A12s

Aug, 9th 2021

Challenge

Since Kadaň City Police had bad experience with cheaper variants before. They are seeking high-quality body worn camera which is able to record interventions and evidence of offenses even in degraded conditions. And the quality of voice recording should be at high level. **And one of the most importance things is data security – only authorized personnel has rights to access the recording and data.**

Organization:

Kadaň Municipal Police

Location:

Kadaň, Czech Republic

Application:

Safety, security and crime prevention

Industry segment:

Government

Partner:

KOMS Mělník a.s.

Solution

Therefore, Kadaň City Police came to choose ViPRO body worn camera.

Control of BV-A12s is intuitive and simple. It not only offers more object evidence and interventions while recording. The recording quality is at a high level. BV-A12s is exactly the one that meet the requirements of city police. ViPRO Bodycams also include a docking station, which automatically downloads the recording and starts charging the camera when the personal camera is inserted. Only police officers with appropriate user rights have the ability to manipulate the downloaded record and modify it in any way.

User Feedback

“We are very satisfied with the ViPRO body worn camera and we are considering expanding the entire system with a mobile solution.”

– Jaroslav Ölveczki, Deputy Director of Municipal Police Kaden
